

BLISSWOOD PSYCHOLOGY

Competence Centre

SUBJECT: Dwarf Eight (Sinister Z).
[ID-6356278891]

03/25/2024

Scheduled sessions: 12
Attended: 1 (45 Minuten)

PRELIMINARY NOTE:

The subject attended only a single session, which he reportedly used to "show this fucking system what it doesn't want to see."

The following assessment is based on that session, as well as reports provided by Kraken operatives and medical personnel.

PSYCHOLOGICAL EVALUATION:

The subject displayed deliberately cynical and provocative behavior throughout the session. He recounted various sexual encounters and his contempt for the system in a calm yet highly detailed manner, apparently with the intention of provoking a reaction.

The authenticity of these statements was later corroborated through observation reports.

SEXUAL BEHAVIOR:

Hypersexual activity observed, without apparent social or – presumably – gender-specific limitations.

The subject appeared to derive considerable satisfaction from the shock value of various sexual encounters, including:

- Multiple partners from all social strata
- A sexual relationship with Snow White
- Numerous "quickies" in public locations
- According to internist Dr. Thorne, the subject exhibits an above-average penile length (19.5 cm) despite his unusually short stature.

When questioned about this observation, the subject responded dryly: "Guess real size comes from below."

SUBSTANCE USE:

Ostentatious alcohol consumption. Subject arrived at the session visibly intoxicated.

Despite an exceptionally high alcohol tolerance, no signs of impaired self-control were observed.

The subject appears to use alcohol as a statement rather than as a drug.

SOCIAL BEHAVIOR:

Highly intelligent and manipulative.

Deliberately exploits the contrast between his physical stature and his sexual and personal dominance.

Completely resistant to all forms of authority and social control.

Continued S. 2

THREAT ASSESSMENT:

MAXIMUM LEVEL.

The subject is not only immune to Euphorigen and social conditioning, but appears to take genuine pleasure in undermining the system.

The combination of:

- High intelligence
- Sexual attractiveness
- Manipulative aptitude
- Absolute contempt for the system

renders him a critical threat to the social order.

THERAPEUTIC RECOMMENDATION:

The subject rejects all forms of therapeutic intervention.

He used the only session granted to him to explain in detail how "all this psychological bullshit is just another tool of control."

PROGNOSIS:

Extremely unfavorable.

The subject displays no indications of system conformity.

His explicit descriptions of sexual conquests and anti-system views during the session suggest deliberate provocation and deeply rooted contempt for institutional authority.

RECOMMENDATION:

Immediate isolation or elimination upon recapture.

Due to his combination of intelligence, sexual dominance and absolute contempt for the system, the subject represents a threat that should not be underestimated.
